## spiral staircases

Adrian Reynolds spiral staircases are an exceptional addition to both the home or office environments. Handmade to specification all stairs are one off pieces and designed to suit any taste, traditional or contemporary. They have a truly unique look and are more than just a staircase, they are a piece of graceful furniture. All staircases whether spiral or otherwise conform to building regulations.

Shown here are just two examples of spiral staircases. Above is an elegant combination of steel and glass. The waves of balusters have blue glass ball details whilst the treads are a mix of steel and toughened glass.

The staircase on the right takes on a much more minimal feel. This quality bespoke design has both clear glass balusters and treads. The steel central spine and handrail give it a perfect finish with that extra touch of class.

Designs can be produced to fit with any interior and in a varied choice of materials including wood.

# balusters

Balusters can be produced to enhance an existing staircase and are a great way to make a focal point of a landing, staircase, balcony or veranda. Balustrades can be supplied for interiors or exteriors.

# straight staircases

Straight flights of stairs can be supplied to the same high quality specification as our spiral staircases. Bespoke designs are prepared to include various materials. The options are endless and the choice is yours.

The example shown here is a design which uses traditional steel balusters and handrail with glass balls at top and bottom to give a modern twist.
